

**BUREAU OF LAND MANAGEMENT  
MEDFORD DISTRICT-GRANTS PASS RESOURCE AREA  
3040 Biddle Road  
Medford, OR 97504**

**SOUTH DEER FOREST MANAGEMENT PROJECT**

**Scoping Questionnaire**

Below is a list of questions that the South Deer planning team has developed that may be used as a tool to help focus your suggestions and comments that the planning team can refer to and consider as they design the project plan. Specific information from local knowledge would be the most useful. Completed questionnaires can be returned to the address above and addressed to Abbie Jossie-Field Manager, or Frank Hoeper-Project Team Leader 541-618-2390. (Fax 541-618-2400).

1. Where are the important wildlife/botanical areas or unique habitats that you are knowledgeable about? Would you be willing to meet with BLM personnel to share your knowledge? If yes, please provide contact information in the space provided at the bottom of the questionnaire.
  
2. Are you interested in partnering with BLM to achieve land management objectives such as watershed restoration or fuels reduction? If yes, please provide contact information.
  
3. Where do you think fire and fuels hazard reduction should occur within the project area? Are you aware of areas of high fuel loading on BLM land that is near or adjacent to private land? If yes, please provide contact information in the space provided at the bottom of the questionnaire.
  
4. Would you like to be notified prior to burning operations in the project area? If yes, please provide contact information in the space provided at the bottom of the questionnaire.
  
5. What type of fuel hazard reduction treatments/tools do you favor? (i.e., underburning, hand cutting and piling, mechanical treatments)

6. Do you have specific knowledge about features or areas that have cultural/historical/recreational significance? If yes, please provide contact information.
7. Are you willing to allow BLM contractors access across your land? If yes, please provide legal description of your land and contact information.
8. Many resource objectives such as increasing individual tree vigor to reduce the impacts of insect attack can be met by vegetation manipulation (i.e., forest stand density reduction, or thinning). What objectives can you identify that you support that can be achieved by vegetation manipulation? What tools do you support using to meet objectives (i.e. prescribed burning, cable/helicopter logging)?
9. What other information would you like to share with the BLM Grants Pass Resource Area Field Manager or the planning team regarding the South Deer Forest Management Project?
10. Would you like to be kept informed as to the status of the project? If yes, please provide contact information in the in the space provided below.
